

**CS-8 Casting System**

# Specifications

## Casting System Model CS-8

### Machine specs:

|                        |                     |
|------------------------|---------------------|
| Machine width          | 28 inches (1220 mm) |
| Machine length         | 18 feet (813 mm)    |
| Machine height         | 48 inches (1470 mm) |
| Max carrier film width | 8 inches (          |

### Power requirement:

|                      |  |
|----------------------|--|
| Heat & control power | 208-220 VAC<br>3-phase 30 amp 50/60 Hz<br>40 amp neutral |
|----------------------|--|

### Air requirements:

|                        |                        |
|------------------------|------------------------|
| Operating air pressure | 90-120 PSI (6-8.2 bar) |
|------------------------|------------------------|

### Nitrogen:

|                          |
|--------------------------|
| 50-120 PSI<br>40-50 SCFH |
|--------------------------|
